OBJECTIVE

ACADEMIC DETAILS

- I T I Industrial training institute [2017] with aggregate of 89%% from MINERVA INSTITUTE

WORK EXPERIENCE

- Worked as Maintenance assistant (training) in SEVEN HILLS PAPER PVT LTD G.Ragampeta Andhra pradesh from Aug 2017 to Jan 2018
Role :Training for a Mechanical Technician is a structured, hands-on educational program designed to equip individuals with the technical expertise required to assemble, install, maintain, and repair industrial machinery and mechanical systems. Whether through formal apprenticeships or technical institute programs, this training blends theoretical knowledge with intensive workshop practice.
- Worked as Mechanical Fitter in INTERSNACK Rajamundry from May 2018 to Jun 2023
Role :
I possess comprehensive mechanical expertise in maintaining the entire cashew processing line, from raw nut handling to final packaging. My skills cover the full operational lifecycle of specialized equipment, including calibrating nut shell cutters and kernel peelers, maintaining the structural integrity of bucket elevators and conveyor systems, and ensuring the precision of roasting, cooling, and color sorting units. I am highly proficient in breakdown recovery, routine preventive maintenance—such as bearing lubrication, belt tensioning, and gearbox servicing—and the precision fabrication of custom machine components, safety guards, and conveyor railings using welding, drilling, and tapping tools. By strictly following all documents, adhering to GMP standards.
- Worked as Mechanical Technician in Hindustan foods Pvt Limited Hyderabad balnagar from Jun 2023 to Dec 2023
Role :Attends Breakdowns Preventive Maintenance General machinery running observations lubricants points checking.

pvc belt conveyor's, and calibration vibrator machines, Screw conveyor's, rotary pumps (centrifugal), camical Mixer's, dump hoppers, liquids pipe line's, pneumatic systems, catton packing machinery, understand CCP machinery's, GMP Point's and handling tools like cutting machine's, welding machine, drilling, tapping, vernier's, etc..
- Worked as Mechanical Technician in Pitti Engineering Kothur Telagana from Dec 2023 to Jun 2024
Role :Machinery: 50-ton to 1000-ton Hydraulic Press Machines.
Equipment: Sheet metal cutting machines, coil process lines, EOT cranes.
Systems: Pneumatic control systems and industrial mechanical assemblies.
Operational Focus: Troubleshooting, component calibration, system upgrades, and safety standard adherence.
- Working as Maintenance Technician in Fanar Al Khaleej UAE Umm al qwien from Jul 2024 to till date
Role :To ensure peak operational efficiency and full compliance with Good Manufacturing Practice (GMP) standards, my maintenance strategy centers on a rigorous, scheduled approach that blends proactive preventive care with rapid-response breakdown support. I manage the end-to-end lifecycle of critical production assets—ranging from 50kg to 1000kg blending machines and VMC packing systems to specialized components like metal detectors, screw conveyors, and complex pneumatic networks—by executing systematic inspections, calibration, and component testing to mitigate downtime. Beyond mechanical and electrical reliability, I oversee comprehensive VRV AC servicing and maintain meticulous, audit-ready documentation for every intervention, ensuring all maintenance activities strictly adhere to validated GMP protocols to uphold product integrity and facility safety.

FIELD OF INTEREST

- Influencer

SKILLS

- Experienced in overseeing site safety protocols and ensuring compliance with operational standards.

STRENGTH

- Deep understanding of mechanical assemblies (gears, bearings, shafts, chains like the 20B roller chain), hydraulics, and pneumatics.

HOBBIES

- Content Creation

DECLARATION

I hereby declare that the above mentioned details are true to the best of my knowledge.

Date : 3-08-2026

Place : Kirlampudi

(Padala saimurali)
